November 20, 2022

Welcome to Camp Springs Community Church. I trust that you will be blessed today as we study God's Word together. The foundational teaching of the Bible is the Gospel of Jesus Christ, which simply teaches that every person is a sinner (thinks and does wrong things) and is permanently separated from God and Heaven. However, Jesus Christ (God's Son), became a man who died by being nailed to a cross to pay for the sins of the world, and then rose from the grave. Whoever puts his faith in Jesus Christ for salvation will have his sins forgiven and will gain entry into heaven (John 3:16). Please ask us if you have questions.

10 AM Message JEROBOAM'S GOLD CALVES 1 KINGS 12:25-33

MISSIONS & MINISTRIES

Larry Pauley - Director of Church Relations Slavic Gospel Association (excerpt)

Sergei Z., pastor of Salvation Church in Poltava

If we get some aid with heating for the winter, we will be able to continue accommodating people at the House of Prayer, hold our daily meetings for IDPs, and have a Sunday worship meeting for the whole church together with IDPs. Today, when the power often goes off, and we are left in with no heating or light, it is vital to have a power generator and finances for gas and electricity! This kind of aid is needed, and we hope it becomes possible.

Gennadiy S., IDP and Regional Senior Pastor for Luhansk

Every Tuesday in the premises of Ivano-Frankivsk church, in addition to ordinary church services, we hold evangelistic events and distribute humanitarian aid. There are 150 to 200 IDPs coming for those meetings every week, and there are always new people there. With the power outages, we will be forced to temporarily stop this ministry. The power generator seems the only logical solution in this situation. Besides working with IDPs, I have pastoral responsibility for the church in the village of Lesna Tarnovytsa. This church mainly consists of elderly people. If the problem with the electricity supply continues, we will not be able to use electric heaters or even the heating boiler, since electricity is still required for it to operate. This automatically makes it impossible for us to meet for the worship. Therefore, we need a power generator to solve this problem.

Mykola K.

We do not know what the winter holds for us. We pray, worry, and ask for help. The News of Peace Church at Dovzhok village, receives 80 IDPs from the eastern, northern, and southern regions of Ukraine on regular basis. About 25 of those people are located on the church territory, and the other 55 are settled in the families of the church members. We weekly provide IDPs who stay in the families of church members with food for cooking and hygiene products. People located on the church territory receive food and hygiene items daily. Also, we provide food aid to transit immigrants to Western Europe countries who stay with us for 1-2 days. Monthly we prepare and distribute 200-300 food packages (4,000 kg) for IDPs living in our region. We are sure any aid with gas, electricity, firewood, and generators is vital and will help us survive the upcoming winter.

Andrei K., pastor of The Kompas Church (Zhytomyr)

It becomes more difficult to survive the cold period in Ukraine because of the damage caused to critical infrastructure. Although at the city council level there are plans to organize 40 heating points, there is no funding for those plans right now. Churches understand they have to become heating points with hot tea and charging abilities for people. But we need the help from outside in order to accomplish this. We definitely need to become centers capable of meeting people's minimal needs. A good testimony about the church among people will be formed this way. This is a great opportunity for the church to become "a light for the world" literally.

Bokoch S.

The electricity is turned off quite often, and pastors with a request to help them to purchase generators, small stoves, and firewood for the winter contact me daily. We have a great need for this area.
